

# Qroo Paul's Spanish Master Course

## Lesson 8 Summary

### Skool.com/qroo

This lesson introduces the periphrastic future in Spanish using the construction *ir a + infinitive*. This structure is widely used in everyday speech to express what someone is going to do. Its parallel with the English “going to + verb” makes it intuitive for learners, and its compatibility with other modal constructions already introduced in the course allows for immediate integration into functional speech.

---

#### 1. Structure: *ir a + infinitive*

The periphrastic future is formed by conjugating the verb *ir* in the present tense, followed by the preposition *a* and a verb in the infinitive form.

##### Formula:

[conjugated form of *ir*] + *a* + [infinitive verb]

##### Examples (structure only):

- *Voy a descansar.* — I am going to rest.
  - *Vamos a comer.* — We are going to eat.
  - *¿Van a estudiar?* — Are they going to study?
- 

#### 2. Conjugation of *ir* in the Present Tense

| Subject Pronoun         | Conjugation |
|-------------------------|-------------|
| yo                      | voy         |
| tú                      | vas         |
| él / ella / usted       | va          |
| nosotros / nosotras     | vamos       |
| vosotros / vosotras     | vais        |
| ellos / ellas / ustedes | van         |

This conjugation chart applies directly to the *ir a + infinitive* construction.

---

### 3. Integration with Other Modal Patterns

This structure complements previously introduced constructions in which a conjugated verb is followed by an infinitive:

- **querer + infinitive**  
*Quiero practicar.* — I want to practice.
- **tener que + infinitive**  
*Tienes que estudiar.* — You have to study.
- **poder + infinitive**  
*¿Pueden descansar?* — Can they rest?

The *ir a + infinitive* pattern fits into this family, allowing learners to expand functional language use without requiring new verb forms.

---

### 4. Common Verbs Used with This Structure

This pattern can be applied to a wide variety of high-frequency infinitives:

- *descansar* — to rest
  - *comer* — to eat
  - *practicar* — to practice
  - *confirmar* — to confirm
  - *estudiar* — to study
  - *hacer* — to do, to make
  - *comprar* — to buy
  - *viajar* — to travel
- 

### 5. Lexical Expansion: Cognate Conversion Strategy

This lesson reinforces the *-TION to -AR* conversion strategy for recognizing and generating Spanish verbs from English nouns.

#### Example:

- English noun: *confirmation*
- Remove *-tion*: *confirm-*
- Add *-ar*: *confirmar*

**Result:**

*Voy a confirmar la información.* — I'm going to confirm the information.

This method allows learners to increase their usable vocabulary efficiently.

---

**6. Combining with Interrogatives**

The *ir a + infinitive* structure can be used to ask about future actions by pairing it with question words such as *qué* (what), *dónde* (where), and *cuándo* (when).

**Examples:**

- *¿Qué vas a hacer hoy?* — What are you going to do today?
- *¿Dónde va a comer?* — Where is he/she going to eat?
- *¿Cuándo van a salir?* — When are they going to leave?

This use mirrors English and enhances communicative range.

---

**7. Pronunciation Consideration**

When *ir a* is followed by a verb that begins with a vowel, the two **a** sounds often blend in spoken Spanish.

**Example:**

*Voy a ir* may be pronounced as *voyair*, with no pause between the vowels.

This is a natural phenomenon in fluent speech and does not affect grammatical correctness.

---

**Key Takeaway**

The *ir a + infinitive* construction is a high-frequency, low-effort structure for expressing future intentions in Spanish. Its regularity, compatibility with newly acquired vocabulary, and similarity to English make it ideal for early and sustained use. Students are encouraged to internalize this pattern as part of a growing set of modal expressions that support spontaneous and accurate communication.
